What are the challenges of a disclosure program?

- Inadequate, non-existent or overly complicated disclosure policies and/or guidance
- Lack of awareness on how, when and where to disclose
- Disconnect between underlying business activity and the need to disclose
- Lack of effective tools to submit, review and manage disclosures
- Poor documentation, reporting and analytics on disclosure risks

What are the benefits of a disclosure program?

- Allows employees to comply with policies
- Drives a positive engagement with the compliance program
- Helps company to identify risks and address issues pro-actively
- Fulfills regulatory disclosure requirements (where applicable)
- Supports evaluation criteria for an effective ethics and compliance program

Disclosure Best Practices

- The Basics
- Benchmark Data
- Workflows & Automation
- Best Practices
- Audience questions

Disclosure Timing Is Critical

How long does it take to:

- Make the disclosure

- Review/approve the disclosure

- Resolve/close the disclosure

Making Disclosure Easy Drives Engagement

Getting employees to disclose is directly related to the process.

Keep it simple and intuitive.

Forms & Questions

- Keep forms short and focused
- Create distinct form for each disclosure type
 - Use targeted questions for each disclosure type
- Start a conversation – build engagement
- Pilot test your forms with small groups and compliance team

Process

- Link forms to underlying business activities, where possible
- Limit number of approvers and thresholds
- Follow-up where more details are needed
- Structure data for easy analytics and reporting
- Adjust as you gain insight and feedback

Simplifying the Review Builds Trust and Transparency

Get the right people
involved at the right time.

Deliver resolutions quickly
and consistently.

Review Process

- Keep it simple – limit levels and number of reviewers
- Design approval workflows for separate forms
- Ensure consistent adjudication and resolutions
- Delegate where appropriate

Response

- Set clear expectations for response times and consistency
- Deliver quick responses and resolutions
- Get input from SMEs as needed
- Follow-up where remedial measures are required

Considerations

- Decide whether managers approve or get notification only
- Automation may require changes in your policies
